josephstudio

08/2023 - 09/2023
Achievements/Tasks

- This project was done using Next.js and hosted on Vercel

- webiste : josephstudio

SKILLS

Reactjs | Nodejs | Nextjs | Mongodb | Sql

Git | Redux | Socket IO | JWT

PERSONAL PROJECTS

whatsapp Web Clone
- The WhatsApp web project uses NodeJS and React for connectivity, while MongoDB Atlas is used for data storage. Features include real-time chat, video, audio, image, and emoji conversations, as well as video calls, audio calls, and SMS notifications. User status (last seen, online), profile editing, and token authentication are all included in the project
- Github Link : whatsappclone
- Link : whatsappclone

Netflix Clone
- Netflix projects include various functions such as login, signup, movie details, search bar, and payment options. The movie data is retrieved from the IMDB database, authentication is handled by Firebase, and each movie's trailer is accessed through the react-youtube package manager
- Github Link : netflixclone
- Link: netflixclone

Pinnacle (College Fest Event Registration)
- In this project, I worked as the lead and contributed to the development. Finally, we hosted it on the DigitalOcean cloud
- Github Link: pinncale
